Good afternoon, Scott Nguyen

I am reaching out to confirm that the Master of Science in Electrical Engineering offered through the University of New Mexico's Accelerated Online Program (AOP) is delivered in a fully online format. Courses are designed to be asynchronous, meaning there are no set meeting times, with access to lectures, assignments, and course materials at your convenience.

The flexible structure of AOP courses allow for you to complete coursework outside of standard working hours, making it possible to maintain full-time employment while completing your degree. While weekly deadlines and participation requirements are set by each individual instructor, you can still plan your study schedule around professional and personal commitments.

If you or your employer require additional details about the program's format or expectations, please feel free to reach out to us at online@unm.edu or call (505) 277-9000. We'd be happy to provide more information.

With Best Regards,
Ellie Walton
