

Project Presentation and Paper Submission

Paper and Presentation Due: Saturday at 10 am, December 13th, 2025

Delivery materials:

- **Powerpoint presentation.**
- **Final paper. The limit is 5 pages (for groups: 5 pages per group member).**
- **A summary of responses for:**
 - **All of the oral comments that I provided during your presentation.**
 - **All of the typed comments that I attached for the graded version of the revised proposal.**

#1. Presentation Date: You will be presenting the final project by selecting a spot from:

Thursday Times: 11:00 am to 9 pm.

Zoom link for Thursday:

<https://unm.zoom.us/j/8307784406>

You must select a spot to present by going online to (deadline = December 10th, 2025):

https://docs.google.com/spreadsheets/d/1wxmw53JXowrUtzQpAZOcHL_W5x6LcnztNkJ8ih-4QDs/edit?usp=sharing

Everyone is invited to attend each presentation. Furthermore, I will most likely ask you to present earlier if there is a gap in the presentation times.

Failure to present will result in **substantial loss of credit for the course project (down to zero credit).**

Presentation Guidelines:

- **You must keep track of the feedback received during your presentation. You will be expected to address the feedback in your final paper and presentation submission.**
- **Need to cover 15 minutes: 12 minutes of slides and 3 minutes for questions.**
- **Roughly 12 slides, 1 minute per slide. Groups can present up to 25 minutes.**
- ***Basic method presentation slide layout:***
 - Title slide with your name, title, date
 - Outline slide summarizing the different parts of your talk
 - Introduction and Motivation of the Problem
 - Background: Existing or competitive methods and what they have missed
 - Proposed Method described via flow-chart or pseudocode
 - Results including side-by-side comparisons with alternative methods (if possible)
 - Discussion of your results and how they relate to other methods
 - Concluding remarks summarizing your accomplishments and proposed future work
- ***Basic review paper presentation slide layout:***
 - Title slide with your name, title, date

- Outline slide summarizing the different parts of your talk
- Introduction and motivation for the review: Why is this area still relevant? Why do you expect this area to grow?
- Background: A summary of older methods that are much older, classical, and will not be the focus of this review.
- Current Systems: An outline of common components and characterize most current systems. Carefully provide choices for the different components. You can demonstrate some basic components
- Emerging Systems: Show some more recent systems that are significantly different than most “deployed” systems and how they differ
- Future Directions and Open problems in the area
- Concluding remarks summarizing problems that you consider closed and where the growth is likely to be

Final Paper Guidelines:

- You can follow your presentation guidelines on how to organize your paper
- Follow the lectures on how to write the paper
- IEEE Journal format required and IEEE-style transactions and journal paper references
- Must clearly show and discuss the database of images that you are working with
- Must show a flow-chart and/or pseudo-code of the methods
- Must have comparisons with different methods or a discussion of how other methods perform
- Try to keep everything under 5 pages. You will need to ask me for permission to exceed this limit. **Groups are allowed to have 5 pages times the number of people in the group.**
- **Provide a separate document summarizing changes suggested during your presentation.**
